

Mobile Camp Capability Brochure

an innovative approach to remote camps

About Toll Remote Logistics

Toll Remote Logistics is a global provider of secure logistics networks in some of the toughest locations on Earth.

Toll Remote Logistics' ability to overcome the challenges of location means that we can provide comprehensive logistic solutions that enable our customers to focus on their core operations.

Toll Remote Logistics can provide complete logistic solutions including:

- Camp Management & Construction
- Supply Chain
- Helicopters
- Air Charters
- Airport Management
- Logistics Consultancy
- Global Freight Forwarding
- Fuel Supply and Distribution

Why work with Toll?

The Toll Group combines the capabilities of large-scale and niche logistics specialists to deliver complete logistics solutions. These solutions are built on technical expertise, state-of-the-art technology, an uncompromising safety culture and a wealth of experience. All of this is underpinned by Toll's strict framework of corporate governance and rock-solid financial foundations.

Toll's logistics infrastructure of air, sea, rail and land transportation means that customers in even the most remote locations from Central Australia to Central Africa are connected to the rest of the world through a multi-modal logistics network. All with the simplicity of a single point of contact.

Mobile Camp Solution

Toll Remote Logistics has developed an innovative camp solution to address the time and cost burden of temporary/mobile camps. This has been achieved by designing a truly mobile camp specifically for rapid deployment in almost any location incorporating plug and play capabilities.

The camp utilises an integrated trailer solution to reduce the infrastructure required for each move. Being fully self-sufficient, moves are completed in shorter timeframes, ensuring project down times and operational costs are kept at a minimum. In addition to this our trailer based solution requires no earth-works, greatly reducing environmental impact and regulatory approval requirements.

Toll's Mobile Camp Solution is more than a donga on wheels - it is an integral component to any remote operation.

How will it benefit your operation

Improved Safety

Toll has designed the camp to meet the highest safety standards. Common safety concerns such as performing overhead lifts, manual labour and working from heights have been engineered out of the design.

Reduced Environmental Footprint

As the mobile camp requires no levelling of the site or any in-ground pipework, there is minimal impact to the environment.

No Capital Expenditure Required

The solution allows business to hire the camps out when required without the capital expense.

Improved Project Timeframes

The camp can be fully mobilised within 2 hours using plug and play capabilities. Being fully self-sufficient there is no requirement for town water, sewerage or power, greatly reducing regulatory approval requirements. Moves are therefore completed in shorter timeframes.

Improved Operational Costs

Operational costs are greatly reduced due to the lower costs associated with relocations, mobilisation and de-mobilisation. These costs savings are realised through to the reduction of specialist equipment such as cranes/ frannas and on site installation works.

Mobile Camp Solution

Key camp features

- ✓ Designed to the highest safety standards
- ✓ Ensued accommodation
- ✓ Full camp mobilisation within 2 hours
- ✓ Same day relocations for moves less than 100km
- ✓ Fully self-sufficient for up to 2 weeks
- ✓ Cyclone rated for winds up to 340km
- ✓ No earthworks or specialist equipment required
- ✓ No capital expenditure required

Trailer Dimensions	
Height	4.25 metres
Width	3.00 metres
Length	14.20 metres
Avg. GVM	28 tonnes
General Information	
Waste Water Treatment	Treated to recycled water standards
Meals provided	Breakfast Lunch / Crib Dinner
Cleaning	Full Clean - Weekly (includes linen change)

Storage Capacities

- Water: 80,000 Litres
- Diesel: 7,000 Litres
- Sewerage: 15,000 Litres
- Chemical Waste Storage: 400 Litres
- Food: 14 Days' Supply

Optional camp facilities

Training Room / Theatre and Office

The training room / theatre provides a multilevel room for 20 people with a wall mounted multi-function television.

The office facility provides 8 work areas for phone or computer use.

First Aid Room and Gym

This unit provides a large share bathroom, fully equipped first aid room with a desk, fridge, storage cupboards and bed.

The gym provides treadmills, exercise bikes, a rowing machine and weight centre with bench.

Large Dining Room

This unit provides internal seating for up to 40 people.

Accommodation Facilities

Each accommodation block can contain either 4 individual or twin-share rooms. Each room shares an ensuite with another room.

Individual Rooms

Equipped with a King Single bed, fridge, flat screen television, desk, robe and air conditioner. With ample living space and quality furnishings, residents will have the perfect space to rest after a hard days' work and refresh for the following day.

Twin-Share Rooms

Equipped with two single beds, fridge, flat screen television, desk, robe and air conditioner. These rooms have been designed specifically for 24/7 operations.

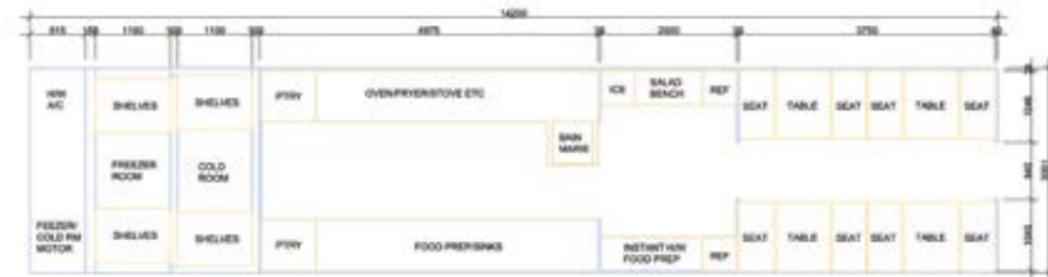

Shared Ensuities

The shared ensuities ensures that residents use minimal water while removing the need to go outdoors to access bathrooms facilities, thereby reducing operational costs and the risk of injury or exposure to the elements at night.

Individual rooms with shared en-suites.

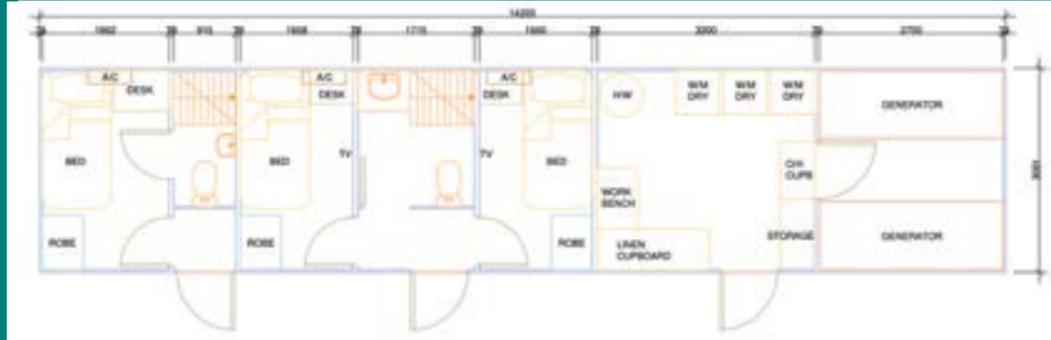

Kitchen / Dining Room

Equipped with only electrical equipment, the commercial kitchen is more intrinsically safe than gas and has been designed to meet all health and safety standards. This includes sterilisation of all water used for cooking and cleaning.

The dining room has an interior seating capacity for 16 people with an extendable awning complete with a large screen television mounted to the side of the unit for alfresco seating for an additional 24 people.

Utility Unit

This facility provides the back bones of the camp including staff accommodation, a commercial laundry and generator room.

Staff Accommodation

1 ensuite bedroom, and 2 bedrooms with shared bathroom for staff

Generator Room

2 generator units for continuous uninterrupted power supply.

Fuel Storage

14 Days' supply in self bunded tanks

Walk in Laundry

3 commercial washing machines

3 commercial driers

Conclusion

Using the Toll Mobile Camp to address project accommodation requirements is a common sense way of addressing short to medium term accommodation requirements – why incur the costs of a modular camp for a short term project when the Toll solution offers lower operational costs with all of the comforts of a traditional camp without the capital investment.

Camp Infrastructure

Walk in Storage Room

Large storage room with over 13m² of floor area.

Sewerage Treatment

Capable of producing clear effluent certified to be used to water gardens or for dust suppression resulting in a more efficient use of this precious resource. The unit can also store treated effluent for removal from site if required.

Potable Water

Water is stored in food grade tanks specifically designed to be mounted under the trailers to ensure maximum sustainability.

Water Treatment

Site specific water treatment solution capable of converting almost any water source in to safe drinking water.
