

Changing access settings in SDX Switch

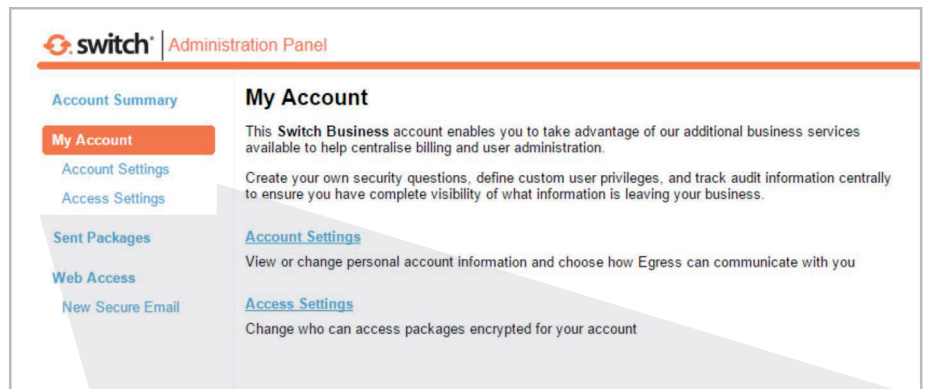

You may need to change your access settings for one of the following reasons:

- You have a Switch ID set up under a group email address that a number of different people have access to. Using access settings, you can authorise additional users to access packages sent to the group email
- You are repeatedly receiving an Access Denied message when trying to access a package

1.

Viewing your access settings

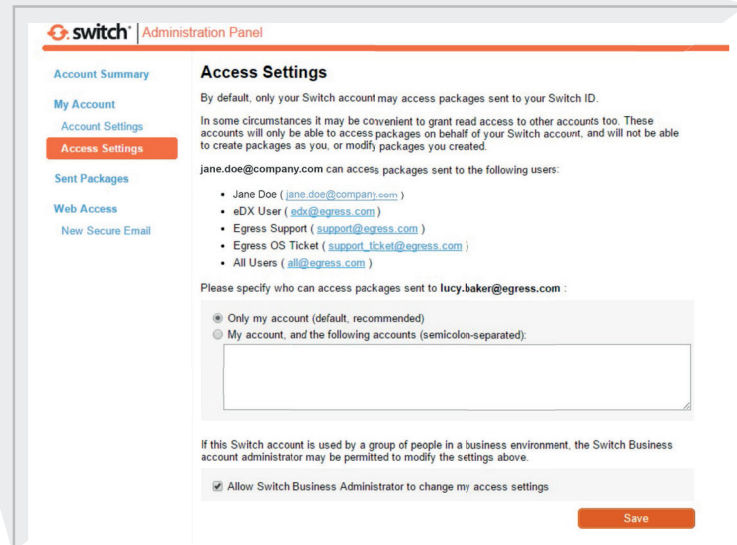

Go to switch.securedigitalexchange.com and sign in to the Administration panel using your Switch ID and password. **Access Settings** is located on the left-hand side under the **My Account** heading.

2.

Granting access to secure packages

In the **Access Settings** window, select the second option (**My account, and the following accounts**) and in the box provided, enter the email addresses of the user(s) you want to grant access to, separated by a semicolon. Click **Save**.

Learn more about SDX Switch Secure Email
